

## Follow steps in order to prepare for the RStudio Symposium

1. Download correct R version for your laptop system from: <https://cran.rstudio.com>
2. Download correct RStudio version for your laptop system from:  
<https://rstudio.com/products/rstudio/download/#download>
3. Open RStudio
4. Open a new R file, File > New File > R Script (.R)
5. Follow prompts to download necessary packages to open R Script (.R)
6. Open a new a R Markdown file, File > New File > R Markdown, and follow prompts to download necessary packages to open R Markdown
7. Open "open and run before symposium.R" located in the "RStudio symposium" folder
8. Run codes which will install all needed packages for symposium in the example below:

```
install.packages("drc")  
install.packages("ggplot2")  
install.packages("tidyverse")  
install.packages("markdown")  
install.packages("rticles")  
install.packages("qpcR")  
install.packages("Rmisc")  
install.packages("cowplot")  
install.packages("lattice")
```

## Reproducible research section (recommended but not required)

Recommended for those ones interested in writing manuscripts in RStudio.

1. Download LaTeX for your laptop system from: <https://www.latex-project.org/get/>
2. Download Zotero for your laptop system from: <https://www.zotero.org>
